Amida

Gig & Invoice Management for Freelance Musicians

Business & Valuation Overview

Pricing Strategy, Growth Projections & Technical Due Diligence

March 2026

Product Overview

Amida is a SaaS platform purpose-built for freelance musicians to manage gigs, invoices, expenses, and contracts. Available as a web app and native iOS app.

52,000+ LINES OF CODE	**96%** TEST COVERAGE
1,600+ AUTOMATED TESTS	**2** PLATFORMS (WEB + IOS)

Technical Stack

Next.js 16 · React 19 · TypeScript · Supabase (PostgreSQL) · Stripe · Apple IAP · Capacitor (iOS) · Resend (Email) · Anthropic AI · Vercel

Technical Highlights

AREA	DETAIL
Architecture	Multi-tenant with Row-Level Security on 31+ tables
Database	72 versioned migrations, atomic operations
CI/CD	GitHub Actions — lint, typecheck, unit + integration tests
Security	CSP headers, HSTS, webhook signature verification, RLS isolation
Payments	Stripe (web) + Apple In-App Purchase (iOS)
Localization	Swedish & English (i18n-ready for expansion)

Pricing Strategy

Analysis of $5.99 vs $9.99 monthly pricing and its impact on growth, revenue, and valuation.

Price Sensitivity Analysis

FACTOR	$5.99/MONTH	$9.99/MONTH
Trial-to-paid conversion	8–12%	5–8%
Expected signup reduction	Baseline	20–35% fewer
Revenue per user/year	$71.88	$119.88
Users needed for 3M SEK	~780	~467
Churn behavior	Higher (low commitment)	Lower (serious users)
Perceived positioning	"Cheap tool"	"Professional tool"

The critical math

100 users at $5.99 = $599/month. Lose 30% at $9.99 but keep 70 users = $699/month.
17% more revenue with fewer users.

You need to lose more than 40% before $5.99 wins — that almost never happens with a $4 difference on a business tool.

Why $9.99 Is the Right Price

Advantages of $9.99

- Musicians invoice thousands per gig — $10/month is negligible
- Filters for serious freelancers, not hobbyists
- Lower support burden, less churn
- You can discount down (annual plan at $5.99)
- Buyers value higher ARPU — signals room to grow

Risks of $9.99

- Slower initial adoption — first 100 users take longer
- Competitor could undercut at $5/month
- Smaller niche + higher price = narrower addressable market

Recommended Pricing Structure

FREE	PRO	TEAM
$0	**$9.99**	**$19.99**
forever	per month	per seat/month
Acquisition funnel	$5.99/mo billed annually	Orchestras & ensembles

Growth Projections & Valuation

Based on 100 initial paying users, $9.99/month pricing, and 15% month-over-month growth.

Revenue Trajectory

MONTH	PAYING USERS	MRR	ARR	VALUATION (5X)
0	100	$999	$11,988	$60,000
3	152	$1,519	$18,228	$91,000
6	230	$2,299	$27,588	$138,000
10	**400**	**$3,996**	**$47,952**	**$240,000**
12	**530**	**$5,295**	**$63,540**	**$318,000**
16	925	$9,241	$110,892	$554,000

Valuation Targets

TARGET	ARR REQUIRED	MRR REQUIRED	USERS @ $9.99
$140,000 (1.5M SEK)	$28,000	$2,333	~234
$280,000 (3M SEK)	**$56,000**	**$4,667**	**~467**
$560,000 (6M SEK)	$112,000	$9,333	~934

Valuation multiplier drivers

SaaS businesses typically sell at 3–5x ARR. Amida's exceptional test coverage (96%), multi-tenant architecture, and niche market position support a premium 5x multiple.

Key Metrics for Buyers

METRIC	TARGET	WHY IT MATTERS
MRR	$2,500+	Minimum threshold for marketplace listing
Monthly churn	< 5%	Low churn = predictable revenue = higher multiple
MoM growth	10–20%	Growth trajectory matters more than absolute numbers
Revenue history	6–12 months	Proves sustainability, not a spike
LTV	> $100	Shows users stick around and pay

Bottom Line

~470 users

paying $9.99/month to reach 3M SEK valuation

With 15% monthly growth from 100 users, this is achievable within 10–12 months. The price you can't raise later is always the wrong launch price. **Start at $9.99.**
